

UofSC Shuttles

Accessibility

Buses should be expanded to hold more students.

There should be more on-call transportation options.

Seats should be wider to allow for social distancing.

There should be a section for immunocompromised and/or ill students to sit away from others.

Routes should be expanded to go to more places across campus.

Ease of Use

Shuttles should stay at their respective stops for at least 5 minutes, allowing users enough time to get on the shuttle.

The card system should be updated on shuttles, allowing for the Carolina Card to be tapped, swiped, or inserted as if it has a chip.

Each route should have at least 2-3 buses.

Map of all bus stops located throughout all of campus

Safety

There should be a separate door that only opens when a Carolina Card is scanned, to ensure safety of students.

Students should be dropped off closer to their exact destination when dark outside

EMS contact buttons on bus incase of an emergency

App

Live tracking of buses

Notifications for users when a bus is nearby/delayed/etc.

Calendar for users to plan out their bus schedule for the day

Meters showing how full the bus is so users know if they will be able to fit on bus

Live ETA so users can determine if the bus will get them to their destination on time

A log of previously taken bus routes so users can remember what routes worked for them

Misc.

A system should be implemented for drivers to drop people off at their exact stops, instead of stops that might still require walking.

More buildings should have nearby parking options for students that drive.
